Automotive Glass Experts (AGE) Strengthen Global Services with New Partnership with SCAR from Italy

Automotive Glass Experts (AGE) are delighted to announce a strategic partnership with SCAR, a renowned leader in the heavy vehicle industry, as our latest partner supplier. This collaboration represents a significant milestone in AGE's commitment to providing cutting-edge automotive glass services on a global scale.

Founded in 1973 as "Società Commerciale Auto Ricambi," SCAR has evolved into a key player in the heavy vehicle sector. Acquired by the Würth Group in 1980, SCAR has continually expanded its international presence, achieving new milestones and entering diverse markets.

SCAR's mission is to be the European partner of reference for heavy vehicle maintenance. This commitment is reflected in their focus on continuous innovation, high-quality standards, product customization, and a dedication to market and customer orientation. Core values such as transparency, honesty, fairness, and responsible business practices underscore SCAR's business philosophy.

With ISO 9001:2008 certification since 2010, SCAR places a paramount emphasis on quality. This dedication is evident in their commitment to delivering excellence across all products and processes.

As a partner supplier within the AGE network, SCAR will play a pivotal role in enhancing our global services. SCAR will serve as the partner supplier for hand tools, electric tools for workshops, safe workwear, merchandise, wiper blades, and branded products.

"We are excited about the strategic collaboration with SCAR, as it aligns seamlessly with our commitment to excellence, innovation, and delivering top-notch automotive glass solutions globally," expressed Giorgio Pompole, AGE board member responsible for supplier agreements.

This partnership emphasizes AGE's dedication to fostering collaborations with industry leaders like SCAR, guaranteeing that our customers worldwide receive not only high-quality automotive glass services but also a diverse range of premium products.
