Automotive Glass Experts (AGE) Strengthens Partnership with Autoglass Clinic in Belgium.

Automotive Glass Experts (AGE), a leading international network of automotive glass specialists, is pleased to announce its continued collaboration with Autoglass Clinic in Belgium. This decision comes following Cary Group's recent acquisition of Autoglass Clinic and Touring Glass, two prominent companies operating in Vehicle Glass Repair and Replacement in the Belgian market. AGE's board of directors has carefully evaluated the situation and concluded that maintaining Autoglass Clinic as a valued member is the best course of action for the organization and its member portfolio.

With the integration of Autoglass Clinic and Touring Glass, a robust platform in the Belgian market will be established under the unified brand name Autoglass Clinic.

As an international network committed to delivering premium automotive glass services, AGE recognizes the value and expertise that Autoglass Clinic brings to the network. The decision to continue working with Autoglass Clinic underscores AGE's dedication to providing its customers with the best solutions locally. The board of directors is confident that maintaining this partnership will contribute to the success and growth of both AGE and Autoglass Clinic.

"We firmly believe that continuing our partnership with Autoglass Clinic is the right

decision for AGE and our customers in Belgium,” stated Marco Moreno, CEO and Chairman at AGE. “By working together, we can leverage the strengths and capabilities of Autoglass Clinic to deliver the highest standards of automotive glass services, ensuring customer satisfaction and driving innovation in the market.”

AGE remains committed to expanding its global network of automotive glass specialists and providing its customers with a trusted reference in the Belgian market. The collaboration with Autoglass Clinic reinforces AGE’s mission to deliver premium automotive glass solutions and highlights the network’s dedication to excellence and customer-centric approach.
