DATE

April 17, 2026

Automotive Glass Experts (AGE) is proud to announce a new strategic partnership with AGC, a leading global supplier of automotive glass. This collaboration strengthens AGE's mission to offer its members a premier supplier portfolio.

The partnership provides AGE members, who operate in 26 countries, with streamlined access to a trusted European supplier known for its commitment to innovation and quality.

"AGC embodies the qualities of a European Champion that the AGE network seeks," said Giorgio Pompole, AGE Board Member responsible for suppliers. "Its high standards of quality, supply reliability, and local presence are the very strengths our members are looking for."

With a long history of innovation, AGC is at the forefront of developing advanced automotive glass. As the industry rapidly adopts Connected, Autonomous, Shared, and Electric (CASE) technologies, the demand for high-quality smart glass is growing. In response to this trend, AGC delivers advanced solutions that integrate displays, sensors, and antennas to improve vehicle safety, comfort, and connectivity. The company's extensive portfolio includes panoramic windshields, heated glass, and Head-Up Display (HUD) solutions for both original equipment and replacement markets.

"Partnering with AGC is a natural step as AGE continues to expand its network of suppliers," Mr. Pompole continued. "While many of our members are already familiar with AGC's products, this formal partnership allows us to collaborate more closely and improve access to their offerings."

This strategic alliance strengthens the European automotive glass replacement market.
